PROMOTING ORAL HEALTH FOR A HEALTHIER YOU.

Revolv™ believes that promoting oral health has a positive impact on overall health.

For decades, people have long seen the benefits of visits to the dentist and oral care as only providing a healthy mouth and brighter teeth. As more research has been conducted, scientists have identified links to good oral health and positive overall health.¹ In a nutshell this means those trips to the dentist are positively affecting your total body health.

SmileHealth Wellness program was established to address important health concerns such as:

- Diabetes
- Pregnancy
- Certain Cardiac Conditions
- Cancer Treatment

Enrolling in SmileHealth Wellness is Easy

Once enrolled, you will be eligible for one additional cleaning and exam beyond your plan's ordinary limit per benefit period (or periodontal maintenance procedure if you have a history of periodontal surgery). If you are pregnant, this additional cleaning will be allowed during your pregnancy term. If you are undergoing cancer treatment via radiation and/or chemotherapy, you will also be eligible for an additional fluoride application beyond the age limit specified by your group contract.

- *Provides additional assistance for oral health support*
- *Allows additional cleanings for high risk members*
- *Allows for preventive tooth care for cancer patients*
