

Straw Rockets

<https://buggyandbuddy.com/straw-rockets-with-free-rocket-template>

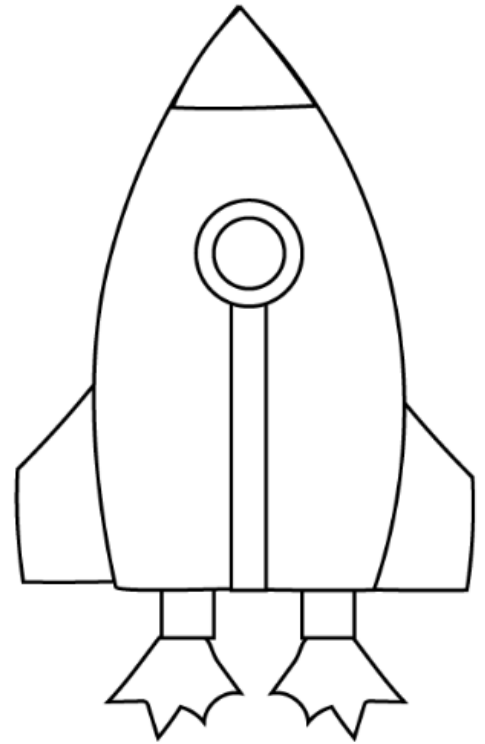

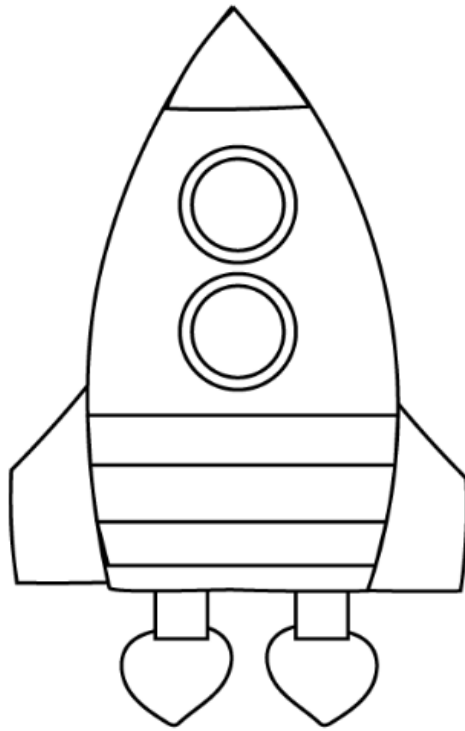

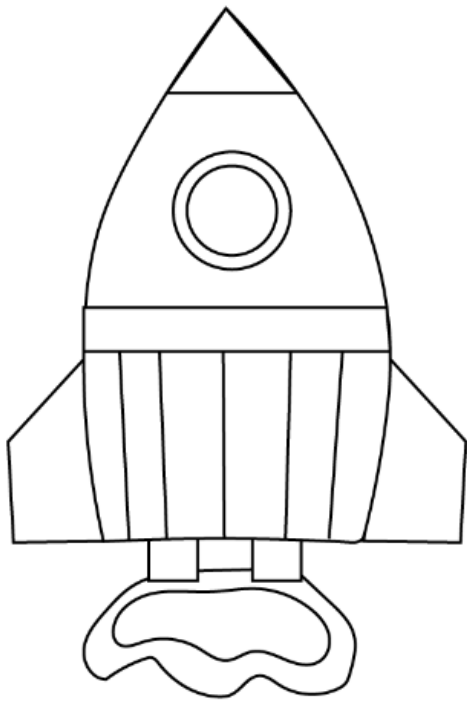

Supplies:

- Straw
- Tape
- Plastic pipettes
- Markers, crayons, or colored pencils
- Scissors
- Rocket Template

Instructions:

1. Color the rockets and cut them out.
2. Cut the bottom off the plastic pipette. Attach the top of the pipette to the back of a rocket using tape.
3. Slip a straw into your pipette, and you're ready to launch! Give one hard, fast blow to make your rocket fly fast and high!
4. Remove the pipette and tape it to another rocket. Did it fly as fast or far as the first?
