

Statement of Energy Code Compliance

Address: _____ Phone Number: _____

Contractor/Owner Name: _____ Permit # _____

I hereby attest that I will be using the following method of compliance for my HVAC duct sealing inspection as required by Section 403.2.9 of the 2018 Virginia Energy Conservation Code (VECC) or Section N1103.3.3 of the 2018 Virginia Residential Code (VRC) as applicable:

- I will perform a Rough-in duct tightness test (duct blaster) and supply the prescribed test results for verification with the above sections prior to approval of my Rough-In Mechanical inspection.
- I will perform a Post Construction tightness test (duct blaster) and supply the prescribed test results for verification with the above sections prior to my final Mechanical inspection.
- Duct blaster not required because my ductwork is inside the thermal envelope. (areas that are insulated and conditioned)

I hereby attest that I will be using the following method of compliance for my Building Envelope air tightness inspection as required by Section 402.5 of the 2018 Virginia Energy Conservation Code (VECC) or Section N1102 of the 2018 Virginia Residential Code (VRC) as applicable:

- I must perform a Blower Door Test per Section 402.5 of the 2018 VECC or Section N1102.4.1.2.1 of the 2018 VRC

To comply with this section, blower door test results must be submitted on a testing company supplied form with evidence provided that the company is using raters certified by an approved agency. Compliance with this section of the VECC shall be certified.

I am aware that I must schedule an insulation inspection after my trade and framing inspections have passed. It is also recommended that I schedule an Air Barrier inspection to help identify areas that might cause the Blower Door Test to fail. If not (check box below):

- I will utilize a nationally recognized energy efficiency program and submit appropriate documentation upon completion in accordance with Section N1101.13 instead of using the Prescriptive Code method.

Note: Outdoor Air shall be provided as specified in VRC N1103.6 & M1507
